## PPE Soft Steel Anchor Sling

Item Code(s): AS02

Manufactured using the same construction technique as a lifting sling, except using a small diameter wire rope core, the soft steel anchor sling is designed for use in work at height activities.

The steel wire rope core construction allows the sling to endure temperatures that would present a serious risk to textile alternatives. Flexible enough to suit a diverse range of uses; choked, end-to-end, or in basket. The sling is portable, light and tough.

### Specs:

- MBS: 18kN
- Galvanised steel wire core
- Polyester webbing outer sleeve
- Standard sizes: 1m, 2m, 3m & 4m – other sizes made on request

### Technical Features
